The purpose of French I is to prepare students to communicate in a very basic manner and to begin developing a global perspective as they are exposed to elements of French life. Students will learn to exchange information about familiar topics, such as family, school, and hobbies, using phrases and simple sentences. They will learn to handle short social interactions in everyday situations by asking and answering simple questions. Reading and writing will progress from simple lists to paragraph length responses. Students are encouraged to begin exploring travel opportunities in French speaking countries around the globe and to draw comparisons between French and American culture.
